DESCRIPTION: The Multidisciplinary Breast Oncology rotation will give the 4th year student a dedicated introduction to the multidisciplinary approach to the management of breast cancer. The student will participate in the multidisciplinary breast cancer clinic, which will be attended by patients and physicians representing all specialties, and will then have the opportunity to rotate one on one with each specialty physician to learn the basics of the skill set each contributes. The rotation will be an outpatient/clinic based rotation, with some time in the operating room. It is anticipated that this will be a valuable learning experience for students interested in primary care, surgical oncology, medical oncology, radiation oncology, plastic surgery, radiology and pathology.
